

# 21sqm 360° Mobile LED Screen

With an impressive 10 minute set up time, this screen can be positioned either down on the base of the trailer, or it can be raised and it can also rotate 360° to offer a more flexible viewing position.

The 21sqm screen is ideal for positioning in tricky places and can be situated next to stages for events, festivals and city centre areas. It comes with its own generator and we can also provide a production unit for vision mixing when the screen is used with cameras.

## Specification:

- LED screen size – 6m W x 3.5m H
- Travelling size of trailer (not including vehicle) – 7.1m L x 1.83m W x 3.03m H
