

12sqm 360° Demountable Mobile LED Screen

This compact unit is the latest in high resolution LED technology and is highly effective, yet an affordable way to heighten any event or business profile.

With an impressive 10 minute setup time, this screen can be positioned either down on the base of the truck, or it can be raised PLUS it can also rotate 360° to offer a more flexible viewing position. The beauty of the demountable screen is that the truck can be driven away from site and the screen left in situ.

The 12sqm screen is ideal for positioning in tricky places and can be situated next to stages for events, festivals and city centre areas. It comes with its own generator and we can also provide production facilities for vision mixing when the screen is used with cameras.

Specification:

- LED screen size – 4.5m W x 2.6m H
- Size of vehicle – 7.06m L x 2.37m W x 3.5m H
